Yes, skypt this weekend would be good.

ILSA is standing still at this stage. Burns today opposed 282 in the senate, and most likely there will be a one year extension of ILSA. It won't be permitted to elapse, but neither is it likely to be extended for five years. In the short term, do not expect any positive developments in it.

I am not sure if it's less risky or more. The main risk sits on your side of the fence. But the social/civil soc atmosphere is definitely getting more restricted. Let's try to skype later this week. Btw, what's happening with ILSA? How can I find out?
